

Washtenaw Community College Comprehensive Report

UAT 278B Teaching Wire Feed Welding Effective Term: Spring/Summer 2016

Course Cover

Division: Advanced Technologies and Public Service Careers

Department: United Association Department

Discipline: United Association Training

Course Number: 278B

Org Number: 28200

Full Course Title: Teaching Wire Feed Welding

Transcript Title: Teaching Wire Feed Welding

Is Consultation with other department(s) required: No

Publish in the Following: College Catalog , Web Page

Reason for Submission: Course Change

Change Information:

Credit hours

Rationale: Adjustment of credit hours for HLC requirements

Proposed Start Semester: Spring/Summer 2016

Course Description: This course focuses on training the trainer and will provide the student with an understanding of how to teach the orbital wire feed welding process at the local level. Topics cover the operation, technology, equipment set-up and safety issues associated with these types of advanced welding systems. Additionally, the course includes process variables, system programmer control functions, weld parameter selection and gives the theoretical basis for weld program development. The course is structured to provide students a hands-on training approach using the AMI 227 and Liburdi Gold Track orbital wire feed welding systems. Limited to United Association program participants.

Course Credit Hours

Variable hours: No

Credits: 1

Lecture Hours: Instructor: 15 Student: 15

The following Lab fields are not divisible by 15: Student Min, Instructor Min

Lab: Instructor: 5 Student: 5

Clinical: Instructor: 0 Student: 0

Total Contact Hours: Instructor: 20 Student: 20

Repeatable for Credit: NO

Grading Methods: Letter Grades

Audit

Are lectures, labs, or clinicals offered as separate sections?: NO (same sections)

College-Level Reading and Writing

College-level Reading & Writing

College-Level Math

No Level Required

Requisites

Enrollment Restrictions

Admission into the UA Instructor Training Program.

Proposed For:

Student Learning Outcomes

1. Explain the concepts of operation, technology, equipment set-up and safety issues associated with advanced welding systems.

Assessment 1

Assessment Tool: Survey of UA Training Coordinators/ Supervisors.

Assessment Date: Spring/Summer 2012

Assessment Cycle: Every Three Years

Course section(s)/other population: All

Number students to be assessed: Random sampling of 50% of all students who teach this topic the following year.

How the assessment will be scored: Students' training activities will be scored and evaluated on the survey questionnaire for each of the outcomes.

Standard of success to be used for this assessment: 75% of all student-instructors will score satisfactory or above on the Training Coordinator survey.

Who will score and analyze the data: The UA Program Administrator will coordinate the collection of data with the UA Training Department staff and will share results with ITP teaching faculty.

2. Demonstrate techniques for weld parameter selections and system programmer control functions.

Course Objectives

1. Explain the common industry applications of advanced welding systems
2. Describe the current issues associated with advanced welding systems.
3. Identify safety precautions when using orbital wire feed equipment.
4. Properly set orbital machine programmable controls for a variety of metals and sizes.
5. Demonstrate the correct techniques for preparing and joining metal tubing.
6. Reference UA and vendor supplied teaching materials in classroom lectures.
